EDUCATION

BACHELOR OF TECHNOLOGY IN COMPUTER SCIENCE ENGINEERING

MADHAV INSTITUTE OF TECHNOLOGY AND SCIENCE, GWALIOR (M.P.)

2023-Present | CGPA: 8.78

XII (M.P Board), GOVT. MODEL HIGHER SECONDARY SCHOOL, INDORE (M.P)

2022 | 90 %

X (M.P Board), GOVT. MODEL HIGHER SECONDARY SCHOOL, INDORE (M.P)

2020 | 97%

EXPERIENCE

INFOSYS SPRINGBOARD | Gen-AI INTERN

(Sept'2025 – Present)

- Applied Python and NLP libraries ([NLTK](#), [spaCy](#), [Transformers](#)) to build text-processing pipelines, including tokenization, sentiment analysis, and entity recognition, improving accuracy of language models in real-world tasks.
- Designed and implemented knowledge graph structures using [RDF frameworks](#) and performed advanced dataset operations (cleaning, transformation, feature engineering) with [Pandas](#) and [NumPy](#).

CDAC, NOIDA | ETHICAL HACKING AND PENETRATION TESTING

(July2024 – Sept'2024)

- Assist in performing penetration tests on networks, web applications, and mobile platforms to identify vulnerabilities.
- Monitoring the network traffic using [WireShark](#) and develop reports.

AFAME TECHNOLOGY | WEB DEVELOPMENT INTERN

(May2024 – July2024)

- Assist in designing, coding, and modifying websites, from layout to function, according to client specifications.
- Support the development and maintenance of front-end and back-end features using technologies like [HTML](#), [CSS](#) and [JavaScript](#).

SKILLS

- LANGUAGES:** C, C++, Python, JavaScript.
- IT CONSTRUCTS:** DS and Algorithms, OOPS, Operating System, DBMS, Computer Netork(TCP/IP), Compiler Design.
- WEB DEVELOPMENT AND DATABASE:** HTML5, CSS3, ReactJS, MERN Stack, MYSQL, Tailwind CSS.
- DEVELOPMENT TOOLS:** Microsoft Visual Studio, GitHub.

PROJECTS

PDC EVALUATION [REACTJS](#) | [TAILWINDCSS](#) | [JAVASCRIPT](#) | [NODEJS](#) | [EXPRESSJS](#) | [MYSQL](#) | [BOOTSTRAP](#)

Oct'2025

- Designed and implemented a **certificate** and **achievement evaluation platform** for students.
- Built a **faculty verification workflow** to validate submissions and ensure authenticity.
- Integrated **grading mechanism** where verified achievements are mapped to performance scores.
- Focused on **user-friendly interface** for both students and faculty, improving transparency and efficiency.
- Enhanced academic evaluation process by **reducing manual effort** and **ensuring standardized recognition of extracurricular achievements**.

FAKE JOB DETECTOR [PYTHON](#) | [M L models](#) | [NLP LIB\(spaCy , etc\)](#) | [PANDAS](#) | [NUMPY](#) | [FLASK](#) | [MYSQL](#)

(Currently work)

- Developed an **AI-powered system** to identify fraudulent job postings.
- Applied **Natural Language Processing (NLP)** techniques to analyze job descriptions and detect suspicious patterns.
- Implemented **Python-based backend** with libraries like **scikit-learn**, **NLTK**, and **spaCy**.
- Designed a **user-friendly interface** to input job postings and display detection results.
- Integrated database support for storing job data and detection outcomes.

ACHIEVEMENTS

- Solved **500+ Data Structures and Algorithms (DSA)** problems on leading platforms like **LeetCode** and **GFG**.
- Campus GitHub Cell, MITS Gwalior | Student Coordinator.**
- Max. rating 1399 on leetCode and 230 rank on GFG contest.**
